

## **EVOLVE LEVEL 2, Audioscript for Unit 11 Quiz B**

Interviewer: Good morning. This morning we're going to be talking to two young people, Victor and Kerry, about their experiences with technology. ...

Victor. Have you ever made a video that went viral?

Victor: Well, I often upload videos onto Youtube, but they aren't usually very successful. I always tell my friends to like them and to watch them. I enjoy making them and that is the most important thing.

Interviewer: What are the videos about?

Victor: Well, the last one I made was about fitness. I love going to the gym and so I make videos about fitness. I don't know if other people like them as much as I do!

Kerry: I have made a video that was very successful. It didn't go viral but the local newspaper called me and asked me for an interview.

Interviewer: Really?

Kerry: Yes. I play in a band with my friends and we have made a few songs. Last year we recorded two songs and we made a video of us.

Interviewer: Wow, that's interesting.... OK, next question for you. Have you ever sent an email to the wrong person?

Victor: Yes, I have! It was awful. Our teacher sent an email to the class to tell us about our homework. I had a lot of homework to do that week, and so when I got this email, I felt stressed. So I sent an email to my friend Jim. I told Jim that I didn't want to do the homework and that I was angry with

the teacher. But... I didn't send it only to Jim. I sent it to the whole class and my teacher!

Interviewer: Oh no! What about you, Kerry?

Kerry: No, I've never sent an email to the wrong person like Victor. But I have sent emails and messages to people, and then five minutes later I think that the email or message was a mistake. You know, the message was too personal, or too angry, or just wrong.

Interviewer: OK, and now for an interesting question. Have you ever found love online?
