### Pay Less!

Everyone knows that vacations can cost a lot of money. There are flights to book, hotels and restaurants to pay for, and vacation souvenirs to buy, of course. So how can you have a cheap vacation? Here's the best advice on the internet.

You should always check a few different websites because you might find better prices for hotels and flights. For cheap flights, try typing in early morning departure times, like 6 a.m., for example. Many people don't like to fly early in the morning or late at night, so you can also look at late-night arrival times. Arriving after midnight often makes the flight cheaper. Look for routes that aren't direct, too. You could fly cheaper if you take two planes instead of just one!

If you're traveling alone, you should stay in a hostel to save money. Many hostels have small kitchens so you can cook food from the supermarket. They also often have books, games, wi-fi, and TV. Some hostels give you free food and free tours of the city. Hostels are great places to make new friends, too.

Use your apps! There are a lot of apps that can help you get good prices on hotel rooms. You just open the app each morning and look for the best prices.

And my best advice ... I'd eat street food! It's delicious, easy to find, and it only costs a dollar or two. You could eat a different dish every day and still save money. Oh, and don't buy water. Take a water bottle with you. Water's free!
