7 I _____ (should/eat) two ice cream cones. I feel sick now.

_____ / 7 (1 point each)

F Read the article. Circle *True* or *False* for each statement.

Big blunders

Rejecting JK Rowling

JK Rowling, author of Harry Potter, is known all over the world today. However, success didn't come easily to her, and for many years she struggled to get her work in print. She submitted script after script to publishers only to receive rejection letters. This was a costly error for these publishers, who clearly should have accepted her work. Finally she had success with Bloomsbury Publishers, and the rest is history!

Throwing away 7,500 bitcoins

A man named James Howells got something very wrong. In his earnestness to clean the house, he threw away something he shouldn't have, and he lived to regret it.

In 2009 James had bought 7,500 bitcoins. He had bought the bitcoins because he was interested in the concept but then didn't think more about it. Five years later, the value of bitcoins soared to over \$800 per coin. James realized that he could have been a very rich man, but, sadly for him, he had thrown away his hard drive which contained the bitcoins. If he hadn't thrown out his hard drive, he would have been a millionaire.

Turning away the Beatles

In 1962, before the Beatles became successful, they wanted to sign a record deal with a music producer. They had made numerous trips to London, wandering the streets and trying to get a company to believe in their music. One of the companies they approached was Decca. On January 1 1962, the group performed a total of 15 songs, hoping for approval from Decca. Unfortunately for Decca, they made the mistake of turning down the Beatles. Decca got it wrong, a blunder they lived to regret as the Beatles became a global success after signing a contract with EMI.

- | | |
|---|----------------------------|
| 1 JK Rowling had problems at first trying to get her work published. | True / False |
