

EVOLVE LEVEL 5 Mid Term Test 1A

LISTENING 2

Our organization, Health2You, needs your help. Perhaps you've never heard of us, so let us explain: we oversee all kinds of new therapies, from breathing techniques to help people calm down, to natural cures for the common cold. We act as a testing laboratory, weighing the pros and cons of every new idea that we come across. We assess the strengths and weaknesses of each product and keep an eye on the long-term effects.

Where do you fit into this? Well, here's how you can help. We are currently looking for the following types of people to test out new products. Maybe one of them sounds like you?

People who sometimes feel tense and uneasy.

People that are introverts, who are reserved, or who have difficulty interacting with others.

People who want to overcome a fear of creepy spiders! Learn how to stop being scared to death!

Students that panic easily about exams and want to find out how to regain control of their emotions.

Men and women of any age whose anxiety levels are high. We have therapies that may help you to calm down.

People who find it hard to operate machines because of a weakness in their hands.

Older people who may feel left out and lonely, but who enjoy the company of other people.

Adults that hesitate to drive a car, ride in an elevator, or take a flight.

Will you join us? We'd love that! If you feel you could take on a role as one of our testers, we want to talk to you. We welcome applications from candidates of any age. Testing is not time-consuming – it takes about one to two hours a week, and of course we will compensate you for your time and traveling expenses.
