

EVOLVE LEVEL 6, Baseline Test B

LISTENING 2

- Grace** What are you doing, Daniel?
- Daniel** I'm messing around with my new app. It's my interpretation of a productivity app. Come here. Feast your eyes on this!
- Grace** Wow! That looks amazing. Nice graphics!
- Daniel** Wait for the next screen. You're gonna be blown away by this. Here it comes.
- Grace** That's so cool. That must have taken you a long time.
- Daniel** It did. I started in January. It was hard to stay focused at first because we had visitors staying with us, and it was a little awkward finding free moments to work. But once they left, there weren't constant interruptions, and I could really focus on my app.
- Grace** How does your app work?
- Daniel** Well, first you type in a list of things you have to do and input how long each one will take. Then you link the app to your calendar and it fits your tasks into the spaces where you have free time. It's a completely new angle on getting things done. Most people have problems being productive because they can't decide what to do first. My app makes the decision for you.
- Grace** I like the idea. How does the app know where you are? Will it tell me to wash the dishes when I'm at work?
- Daniel** No, in this version, you have to decide if the app is for home use or office use.
- Grace** OK. Can you give me a demonstration?
- Daniel** Unfortunately I've run up against some problems linking the tasks with the calendar. I'll show you tomorrow if I can get it fixed!
- Grace** It sounds like you need to be more productive.
- Daniel** At least the first two screens look great! Wanna see them again?
- Grace** No. Show me again when everything's working.
